ETH Hacks Resources

Expanded Information on Technologies:

1. **Polygon**:
   - **Description**: A multi-chain scaling solution for the Ethereum network. It aims to provide faster and cheaper transactions on Ethereum using Layer 2 sidechains, which are blockchains that run alongside the Ethereum main chain.
   - **Use Cases**: Decentralized Apps (DApps) development, Gaming, NFTs, and DeFi projects.
   - **Links**: Website, Twitter, Reddit, Telegram, Discord

2. **Worldcoin**:
   - **Description**: Aims to create a global identity and financial network. It's designed to onboard the next billion cryptocurrency users.
   - **Use Cases**: Identity verification, Financial transactions.
   - **Links**: Website

3. **WalletConnect**:
   - **Description**: An open protocol to connect DApps to mobile wallets using end-to-end encryption. It allows users to interact with DApps on desktop browsers or other platforms using their mobile wallets.
   - **Use Cases**: Securely connecting mobile wallets to DApps, Cross-platform cryptocurrency transactions.
   - **Links**: Website

4. **1inch Network**:
   - **Description**: A decentralized exchange aggregator that sources liquidity from various exchanges. This ensures users get the best rates when swapping tokens.
   - **Use Cases**: Token swaps, Liquidity provision, Yield farming.
   - **Links**: Website

5. **Uniswap Foundation**:
   - **Description**: A popular decentralized trading protocol, ensuring token swaps are efficient and priced fairly. It's known for its automated liquidity provision.
   - **Use Cases**: Token swaps, Liquidity provision.
   - **Links**: Website

6. **Gnosis Chain**:
   - **Description**: Aims to provide a new Layer 1 blockchain based on Ethereum's capabilities. It focuses on research and development of new blockchain solutions.

- **Use Cases**: Decentralized prediction markets, Secure multisig wallets.
- **Links**: Website

7. **IPFS & Filecoin**:
    - **Description**: IPFS allows for the decentralized storage and retrieval of data, while Filecoin is a decentralized storage network that transforms cloud storage into an algorithmic market.
    - **Use Cases**: Decentralized file storage, Data retrieval, Web hosting.
    - **Links**: IPFS Website, Filecoin Website

8. **Ethereum**:
    - **Description**: A decentralized, open-source blockchain system that features smart contract functionality. It's the foundation for the majority of DApps and DeFi projects.
    - **Use Cases**: Smart contracts, DApps, ICOs, and more.
    - **Links**: Website

9. **Chainlink**:
    - **Description**: A decentralized oracle network that allows smart contracts on Ethereum to securely connect to external data sources, APIs, and payment systems.
    - **Use Cases**: Feeding external data to smart contracts, Price feeds for DeFi projects.
    - **Links**: Website

10. **The Graph**:

- **Description**: An indexing protocol for querying data from blockchains, making it possible to retrieve Ethereum data without running a full node.
- **Use Cases**: Data querying for DApps, Analytics, and more.
- **Links**: Website

11. **Optimism**:

- **Description**: Aims to scale Ethereum and reduce transaction costs by using a technology called Optimistic Rollups.
- **Use Cases**: Scaling solutions for DApps, Faster and cheaper transactions.
- **Links**: Website

12. **StarkWare**:

- **Description**: Uses STARK technology to improve scalability and privacy in blockchains.
- **Use Cases**: Scaling solutions, Private transactions.
- **Links**: Website

13. **Immutable X**:

- **Description**: A layer-2 scaling solution for Ethereum, focused on NFTs. It aims to offer gas-free transactions.
- **Use Cases**: Minting and trading NFTs, Gas-free transactions.
- **Links**: Website

14. **zkSync**:

- **Description**: A trustless protocol for scalable low-cost payments on Ethereum, using zkRollups.
- **Use Cases**: Scalable payments, Reduced gas fees.
- **Links**: Website

15. **Moonbeam**:

- **Description**: An Ethereum-compatible smart contract platform on the Polkadot network. It allows developers to deploy existing Ethereum DApps.
- **Use Cases**: Cross-chain integrations, DApp deployment.
- **Links**: Website

16. **Aave**:

- **Description**: A decentralized finance protocol that allows people to lend and borrow crypto.
- **Use Cases**: Lending and borrowing, Yield farming.
- **Links**: Website

17. **Balancer**:

- **Description**: An automated portfolio manager and liquidity provider. It allows for the creation of custom liquidity pools.
- **Use Cases**: Liquidity provision, Custom token pools.
- **Links**: Website

18. **Compound**:

- **Description**: A decentralized finance protocol for borrowing and lending cryptocurrency.
- **Use Cases**: Earning interest on deposits, Cryptocurrency loans.
- **Links**: Website

19. **dYdX**:

- **Description**: A decentralized platform for margin trading and derivatives on Ethereum.
- **Use Cases**: Margin trading, Cryptocurrency derivatives.

- **Links**: Website

20. **MakerDAO**:

  - **Description**: A decentralized organization that provides the Dai stablecoin, which is pegged to the US dollar.
  - **Use Cases**: Stablecoin provision, Collateralized loans.
  - **Links**: Website

21. **Synthetix**:

  - **Description**: A platform for creating and trading synthetic assets on Ethereum.
  - **Use Cases**: Creating synthetic commodities, stocks, and other assets.
  - **Links**: Website

22. **Yearn Finance**:

  - **Description**: A suite of products in Decentralized Finance (DeFi) that provides lending aggregation, yield generation, and insurance.
  - **Use Cases**: Automated yield farming, Insurance provision.
  - **Links**: Website

23. **Curve Finance**:

  - **Description**: A decentralized exchange optimized for efficient stablecoin trading.
  - **Use Cases**: Stablecoin swaps, Liquidity provision.
  - **Links**: Website

24. **SushiSwap**:

  - **Description**: A decentralized exchange that allows users to swap, earn, lend, borrow, and leverage all on one decentralized platform.
  - **Use Cases**: Token swaps, Yield farming.
  - **Links**: Website

25. **UMA**:

  - **Description**: A platform that allows users to create custom collateralized synthetic cryptocurrencies.
  - **Use Cases**: Creating synthetic assets, Decentralized financial contracts.
  - **Links**: Website

26. **mStable**:

- **Description**: Offers assets that are liquidity shares and stablecoins at once. It aims to bring stability to crypto assets.
- **Use Cases**: Stablecoin provision, Liquidity provision.
- **Links**: Website

27. **Alchemix**:

- **Description**: A platform that allows for the creation of synthetic tokens that represent a future yield. Users can get advances on their yield without giving up their assets.
- **Use Cases**: Yield advances, Synthetic token creation.
- **Links**: Website

28. **Badger DAO**:

- **Description**: A decentralized autonomous organization (DAO) that aims to bring Bitcoin into DeFi.
- **Use Cases**: Bitcoin-based yield farming, DAO governance.
- **Links**: Website

29. **BarnBridge**:

- **Description**: A protocol that tokenizes risk in DeFi, allowing users to hedge against price volatility.
- **Use Cases**: Risk management, Yield farming.
- **Links**: Website

30. **Cream Finance**:

- **Description**: A decentralized lending protocol that offers a wide range of services, from lending and borrowing to yield farming.
- **Use Cases**: Lending and borrowing, Yield farming.
- **Links**: Website

31. **Frax Finance**:

- **Description**: A fractional-algorithmic stablecoin protocol. It aims to provide a highly scalable, decentralized, algorithmic money in place of fixed-supply assets like BTC.
- **Use Cases**: Stablecoin provision, Collateralized loans.
- **Links**: Website

32. **Idle Finance**:

- **Description**: A decentralized protocol dedicated to bringing automatic asset allocation and aggregation to the interest-bearing tokens world.
- **Use Cases**: Automated yield farming, Asset allocation.
- **Links**: Website

33. **KeeperDAO**:

- **Description**: An on-chain liquidity underwriter that captures profit opportunities using game theory.
- **Use Cases**: Liquidity provision, Profit capture.
- **Links**: Website

34. **Liquity**:

- **Description**: A decentralized borrowing protocol that allows users to draw interest-free loans against Ether.
- **Use Cases**: Interest-free loans, Collateralized borrowing.
- **Links**: Website

35. **Mirror Protocol**:

- **Description**: A protocol that allows for the creation of synthetic assets called Mirrored Assets (mAssets).
- **Use Cases**: Synthetic asset creation, Token swaps.
- **Links**: Website

36. **Rari Capital**:

- **Description**: A platform that offers various financial products, from yield aggregation to lending and borrowing.
- **Use Cases**: Yield aggregation, Lending and borrowing.
- **Links**: Website

37. **Reflexer Labs**:

- **Description**: Provides a non-pegged stable asset called RAI, which is purely governed by its on-chain controller.
- **Use Cases**: Stablecoin provision, Collateralized loans.
- **Links**: Website

38. **Saddle Finance**:

- **Description**: An automated market maker for pegged value crypto assets.
- **Use Cases**: Stablecoin swaps, Liquidity provision.
- **Links**: Website

39. **Vesper Finance**:

- **Description**: A platform dedicated to creating easy-to-use DeFi products. It offers various pools where users can deposit assets and earn yield.
- **Use Cases**: Yield farming, Asset deposits.
- **Links**: Website

40. **Yield**:

- **Description**: A platform that offers fixed-rate lending and borrowing, providing predictable interest rates.
- **Use Cases**: Fixed-rate lending, Predictable borrowing rates.
- **Links**: Website

41. **Zapper**:

- **Description**: A platform that makes it easy to manage DeFi assets, from swapping tokens to entering/exiting liquidity pools.
- **Use Cases**: Asset management, Token swaps.
- **Links**: Website

42. **Zerion**:

- **Description**: A user-friendly interface to manage an entire DeFi portfolio in one place.
- **Use Cases**: Portfolio management, Asset tracking.
- **Links**: Website

43. **88mph**:

- **Description**: A platform that allows for fixed-rate interest on deposits and upfront interest payment.
- **Use Cases**: Fixed-rate deposits, Upfront interest.
- **Links**: Website

44. **Alpha Finance Lab**:

- **Description**: A platform that looks to address unmet needs in DeFi and create innovative products.
- **Use Cases**: Yield farming, Lending and borrowing.
- **Links**: Website

45. **Bella Protocol**:

- **Description**: Offers a suite of DeFi products for streamlined crypto banking.
- **Use Cases**: Yield farming, Asset management.
- **Links**: Website

46. **DeFi Dollar**:

- **Description**: Aims to be a value pegged stablecoin, backed by a basket of other stablecoins.
- **Use Cases**: Stablecoin provision, Collateralized loans.
- **Links**: Website

47. **DerivaDEX**:

- **Description**: A decentralized exchange for derivatives, allowing users to trade with leverage.
- **Use Cases**: Leveraged trading, Cryptocurrency derivatives.
- **Links**: Website

48. **dForce**:

- **Description**: A DeFi platform that offers a range of products, from stablecoins to lending and borrowing.
- **Use Cases**: Stablecoin provision, Lending

and borrowing.

- **Links**: Website

49. **DODO**:

- **Description**: A next-generation on-chain liquidity provider which leverages the Proactive Market Maker algorithm (PMM).
- **Use Cases**: Token swaps, Liquidity provision.
- **Links**: Website

50. **Ellipsis Finance**:

- **Description**: A platform for secure low-slippage stablecoin swaps.
- **Use Cases**: Stablecoin swaps, Liquidity provision.
- **Links**: Website

51. **Float Protocol**:

- **Description**: A platform that offers a stablecoin which isn't pegged to any specific value, but rather floats.
- **Use Cases**: Stablecoin provision, Collateralized loans.
- **Links**: Website

52. **ForTube**:

- **Description**: A DeFi lending platform that offers both lending and borrowing services.
- **Use Cases**: Lending and borrowing, Yield farming.
- **Links**: Website

53. **Kyber Network**:

- **Description**: A decentralized liquidity platform that allows users to trade tokens directly from their wallets.
- **Use Cases**: Token swaps, Liquidity provision.
- **Links**: Website

54. **Lido Finance**:

- **Description**: A platform that allows users to stake Ethereum 2.0 while still having liquidity.
- **Use Cases**: Ethereum 2.0 staking, Yield farming.
- **Links**: Website

55. **Mushroom Finance**:

- **Description**: A crypto earning ecosystem, offering various yield farming opportunities.
- **Use Cases**: Yield farming, Asset deposits.
- **Links**: Website

56. **Nerve Finance**:

- **Description**: A stableswap AMM designed to suit the needs of stablecoin liquidity providers.

- **Use Cases**: Stablecoin swaps, Liquidity provision.
- **Links**: Website

57. **Nest Protocol**:

- **Description**: A decentralized price oracle based on Ethereum.
- **Use Cases**: Price feeds for DeFi projects, Decentralized oracles.
- **Links**: Website

58. **Pickle Finance**:

- **Description**: A platform that uses farming incentives, vaults, and governance to bring stablecoins closer to their pegs.
- **Use Cases**: Stablecoin management, Yield farming.
- **Links**: Website

59. **Ramp DeFi**:

- **Description**: A platform that allows non-ERC20 staked assets to be collateralized into a stablecoin.
- **Use Cases**: Collateralized loans, Stablecoin provision.
- **Links**: Website

60. **Stabilize Protocol**:

- **Description**: A platform that helps stabilize stablecoins and earn fees from doing so.
- **Use Cases**: Stablecoin management, Fee generation.
- **Links**: Website

61. **Swerve Finance**:

- **Description**: A platform for low-slippage stablecoin swaps.
- **Use Cases**: Stablecoin swaps, Liquidity provision.
- **Links**: Website

62. **Value DeFi**:

- **Description**: A platform that aims to bring fairness, true value, and innovation to DeFi.
- **Use Cases**: Yield farming, Asset management.
- **Links**: Website

63. **Venus**:

- **Description**: A decentralized marketplace for lenders and borrowers with borderless stablecoins.
- **Use Cases**: Lending and borrowing, Stablecoin provision.
- **Links**: Website

64. **xDai**:

- **Description**: A stable payment blockchain that offers fast and inexpensive transactions.
- **Use Cases**: Payments, Stablecoin transactions.
- **Links**: Website

65. **yAxis**:

- **Description**: A meta yield aggregator that uses a combination of portfolio strategies.
- **Use Cases**: Yield aggregation, Asset management.
- **Links**: Website

66. **Yieldly**:

- **Description**: A platform that offers no-loss lottery, multi-asset staking, and cross-chain swapping.
- **Use Cases**: No-loss lottery, Yield farming.
- **Links**: Website

67. **YF Link**:

- **Description**: A platform that offers a range of DeFi products, from yield farming to insurance.
- **Use Cases**: Yield farming, Insurance provision.
- **Links**: Website

68. **Yield Protocol**:

- **Description**: A platform that offers fixed-rate borrowing and lending through the creation of a new kind of stablecoin.
- **Use Cases**: Fixed-rate lending, Stablecoin provision.
- **Links**: Website

69. **bZx Protocol**:

- **Description**: A decentralized protocol that enables lending and borrowing for margin trading.

- **Use Cases**: Margin trading, Lending and borrowing.
- **Links**: Website

70. **mStable**:

- **Description**: Offers assets that are liquidity shares and stablecoins at once. It aims to bring stability to crypto assets.
- **Use Cases**: Stablecoin provision, Liquidity provision.
- **Links**: Website

71. **pNetwork**:

- **Description**: A decentralized system for cross-chain composability. It allows assets and data to move freely between blockchains.
- **Use Cases**: Cross-chain swaps, Decentralized bridges.
- **Links**: Website

72. **PowerPool**:

- **Description**: A decentralized protocol for pooling governance tokens.
- **Use Cases**: Governance token management, DAO governance.
- **Links**: Website

73. **Ren**:

- **Description**: A protocol that enables the permissionless and private transfer of value between any blockchain.
- **Use Cases**: Cross-chain swaps, Decentralized bridges.
- **Links**: Website

74. **Set Protocol**:

- **Description**: A platform that allows for the creation and management of tokenized asset portfolios.
- **Use Cases**: Asset management, Tokenized portfolios.
- **Links**: Website

75. **UMA**:

- **Description**: A platform that allows users to create custom collateralized synthetic cryptocurrencies.
- **Use Cases**: Creating synthetic assets, Decentralized financial contracts.

- **Links**: Website

76. **Unslashed Finance**:

  - **Description**: A platform that offers decentralized insurance products.
  - **Use Cases**: Decentralized insurance, Risk management.
  - **Links**: Website

77. **Wrapped Bitcoin (WBTC)**:

  - **Description**: A tokenized version of Bitcoin on the Ethereum blockchain.
  - **Use Cases**: Bringing Bitcoin's liquidity to Ethereum, Decentralized trading.
  - **Links**: Website

78. **xDollar**:

  - **Description**: A stablecoin platform that doesn't require over-collateralization.
  - **Use Cases**: Stablecoin provision, Collateralized loans.
  - **Links**: Website

79. **Kyber Network**:

  - **Description**: A decentralized liquidity platform that allows users to trade tokens directly from their wallets.
  - **Use Cases**: Token swaps, Liquidity provision.
  - **Links**: Website

80. **Lido Finance**:

  - **Description**: A platform that allows users to stake Ethereum 2.0 while still having liquidity.
  - **Use Cases**: Ethereum 2.0 staking, Yield farming.
  - **Links**: Website

81. **Mushroom Finance**:

  - **Description**: A crypto earning ecosystem, offering various yield farming opportunities.
  - **Use Cases**: Yield farming, Asset deposits.
  - **Links**: Website

82. **Nerve Finance**:

- **Description**: A stableswap AMM designed to suit the needs of stablecoin liquidity providers.
- **Use Cases**: Stablecoin swaps, Liquidity provision.
- **Links**: Website

83. **Nest Protocol**:

- **Description**: A decentralized price oracle based on Ethereum.
- **Use Cases**: Price feeds for DeFi projects, Decentralized oracles.
- **Links**: Website

84. **Pickle Finance**:

- **Description**: A platform that uses farming incentives, vaults, and governance to bring stablecoins closer to their pegs.
- **Use Cases**: Stablecoin management, Yield farming.
- **Links**: Website

85. **Ramp DeFi**:

- **Description**: A platform that allows non-ERC20 staked assets to be collateralized into a stablecoin.
- **Use Cases**: Collateralized loans, Stablecoin provision.
- **Links**: Website

86. **Stabilize Protocol**:

- **Description**: A platform that helps stabilize stablecoins and earn fees from doing so.
- **Use Cases**: Stablecoin management, Fee generation.
- **Links**: Website

87. **Swerve Finance**:

- **Description**: A platform for low-slippage stablecoin swaps.
- **Use Cases**: Stablecoin swaps, Liquidity provision.
- **Links**: Website

88. **Value DeFi**:

- **Description**: A platform that aims to bring fairness, true value, and innovation to DeFi.
- **Use Cases**: Yield farming

, Asset management.

- **Links**: Website

89. **Venus**:

- **Description**: A decentralized marketplace for lenders and borrowers with borderless stablecoins.
- **Use Cases**: Lending and borrowing, Stablecoin provision.
- **Links**: Website

90. **xDai**:

- **Description**: A stable payment blockchain that offers fast and inexpensive transactions.
- **Use Cases**: Payments, Stablecoin transactions.
- **Links**: Website

91. **yAxis**:

- **Description**: A meta yield aggregator that uses a combination of portfolio strategies.
- **Use Cases**: Yield aggregation, Asset management.
- **Links**: Website

92. **Yieldly**:

- **Description**: A platform that offers no-loss lottery, multi-asset staking, and cross-chain swapping.
- **Use Cases**: No-loss lottery, Yield farming.
- **Links**: Website

93. **YF Link**:

- **Description**: A platform that offers a range of DeFi products, from yield farming to insurance.
- **Use Cases**: Yield farming, Insurance provision.
- **Links**: Website

94. **Yield Protocol**:

- **Description**: A platform that offers fixed-rate borrowing and lending through the creation of a new kind of stablecoin.
- **Use Cases**: Fixed-rate lending, Stablecoin provision.

- **Links**: Website

95. **bZx Protocol**:

- **Description**: A decentralized protocol that enables lending and borrowing for margin trading.
- **Use Cases**: Margin trading, Lending and borrowing.
- **Links**: Website

96. **mStable**:

- **Description**: Offers assets that are liquidity shares and stablecoins at once. It aims to bring stability to crypto assets.
- **Use Cases**: Stablecoin provision, Liquidity provision.
- **Links**: Website

97. **pNetwork**:

- **Description**: A decentralized system for cross-chain composability. It allows assets and data to move freely between blockchains.
- **Use Cases**: Cross-chain swaps, Decentralized bridges.
- **Links**: Website

98. **PowerPool**:

- **Description**: A decentralized protocol for pooling governance tokens.
- **Use Cases**: Governance token management, DAO governance.
- **Links**: Website

99. **Ren**:

- **Description**: A protocol that enables the permissionless and private transfer of value between any blockchain.
- **Use Cases**: Cross-chain swaps, Decentralized bridges.
- **Links**: Website

100. **Set Protocol**:

- **Description**: A platform that allows for the creation and management of tokenized asset portfolios.
- **Use Cases**: Asset management, Tokenized portfolios.
- **Links**: Website

101. **UMA**:

- **Description**: A platform that allows users to create custom collateralized synthetic cryptocurrencies.
- **Use Cases**: Creating synthetic assets, Decentralized financial contracts.
- **Links**: Website

102. **Unslashed Finance**:

- **Description**: A platform that offers decentralized insurance products.
- **Use Cases**: Decentralized insurance, Risk management.
- **Links**: Website

103. **Wrapped Bitcoin (WBTC)**:

- **Description**: A tokenized version of Bitcoin on the Ethereum blockchain.
- **Use Cases**: Bringing Bitcoin's liquidity to Ethereum, Decentralized trading.
- **Links**: Website

104. **xDollar**:

- **Description**: A stablecoin platform that doesn't require over-collateralization.
- **Use Cases**: Stablecoin provision, Collateralized loans.
- **Links**: Website
